### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent Application Publication No. 2004/009992 to Elliott et al.

Regarding claim 1, Elliott et al. teach a semiconductor package (Figs. 1 and 2, for example), comprising:

a semiconductor die (510) having a front side and an opposed backside;

a backside metallization (530);

an integrated heat spreader (560); and

a thermal interface (590) including a fluxlessly-capable solder (paragraphs [0020] and [0021]) deposited on a top surface of the integrated heat spreader and bonded to the metallization layer under heat. With respect to the requirements of the bonding being under load and heat, these are considered product-by-process limitations, and have not been given patentable weight. "Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of

Application/Control Number: 10/797,755

Art Unit: 2811

production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

Regarding claim 6, Elliott et al. teach a semiconductor package, wherein the solder portion includes AuSn solder (Paragraph [0021]).

#### **Double Patenting**

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain <u>a</u> patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claims 12 – 27 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 – 16 of prior U.S. Patent No. 6,833,289. This is a double patenting rejection.

The claims of the patent are identical to the currently pending claims, with two exceptions. Claim 6 of the patent requires that the solder layer includes several materials and "Palladium (Td)". Claim 17 of the instant application recites the limitation "Palladium (Pd)". It is understood that the symbol for Palladium is Pd, not Td.

Claim 14 of the patent recites the limitation "...applied to the 2 package...".

Claim 25 of the instant application recites the limitation "...applied to the package...".

Application/Control Number: 10/797,755 Page 4

Art Unit: 2811

The number "2" inserted in the claim of the patent does not affect the scope of what is claimed.

## Allowable Subject Matter

5. Claims 2 – 5 and 7 – 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas W. Owens whose telephone number is 571-272-1662. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eddie C. Lee can be reached on 571-272-1732. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
